- The rebranding of the word “Reparation” to “Restitution for the illegal kidnapping during the trans- slave trade genocide”.

Issue: Regarding restitution for the illegal kidnapping during transatlantic slave trade

14th Amendment, Section 4 (Public Debt Clause)

"Neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations, and claims shall be held illegal and void."

Solution: To solve a problem, it must be pulled from the root. In this case the root is the Constitution, Bill of rights, US Code. (This Focus will solve the national and international issue.)

FAST FORWARD, THE WORD “REPARATIONS” IS ILLEGAL WHEN
REFERRING TO “SLAVE” AKA PROPERTY

The reversal of 40 acres and a mule narrative

Definition of Slave:

A person is treated as **property** or owned.

- They cannot freely leave or refuse labor.
- Their movement is controlled.
- Their labor is taken through force, coercion, or threat.
- They may be bought, sold, inherited, or transferred.
- They are denied fundamental legal rights and personal autonomy.

During the President Andrew Johnson restored land to former Confederate owners who pardoned themselves the federal government returned most confiscated land. This was called “**property compensation**” not **reparations** at the time of **emancipation**, which paid **slaveholders** for the loss of **enslaved people** treated as **property**

Democracy In America Alexis de Tocqueville 1831

Chapter XV: Unlimited Power Of Majority, And Its Consequences – Part I

Chapter Summary

Natural strength of the majority in democracies – Most of the American Constitutions have increased this strength by artificial means – How this has been done – Pledged delegates – Moral power of the majority – Opinion as to its infallibility – Respect for its rights, how augmented in the United States.

Unlimited Power Of The Majority In The United States, And Its Consequences

The very essence of democratic government consists in the absolute sovereignty of the majority; for there is nothing in democratic States which is capable of resisting it. Most of the American Constitutions have sought to increase this natural strength of the majority by artificial means. [129]

The legislature is, of all political institutions, the one which is most easily swayed by the wishes of the majority. The Americans determined that the members of the legislature should be elected by the people immediately, and for a very brief term, in order to subject them, not only to the general convictions, but even to the daily passion, of their constituents. The members of both houses are taken from the same class in society, and are nominated in the same manner; so that the modifications of the legislative bodies are almost as rapid and quite as irresistible as those of a single assembly. It is to a legislature thus constituted that almost all the authority of the government has been entrusted.

But whilst the law increased the strength of those authorities which of themselves were strong, it enfeebled more and more those which were naturally weak. It deprived the representatives of the executive of all stability and independence, and by subjecting them completely to the caprices of the legislature, it robbed them of the slender influence which the nature of a democratic government might have allowed them to retain. In several States the judicial power was also submitted to the elective discretion of the majority, and in all of them its existence was made to depend on the pleasure of the legislative authority, since the representatives were empowered annually to regulate the stipend of the judges.

Custom, however, has done even more than law. A proceeding which will in the end set all the guarantees of representative government at naught is becoming more and more general in the United States; it frequently happens that the electors, who choose a delegate, point out a certain line of conduct to him, and impose upon him a certain number of positive obligations which he is pledged to fulfil. With the exception of the tumult, this comes to the same thing as if the majority of the populace held its deliberations in the marketplace.

Several other circumstances concur in rendering the power of the majority in America not only preponderant, but irresistible. The moral authority of the majority is partly based upon the notion that there is more intelligence and more wisdom in a great number of men collected together than in a single individual, and that the quantity of legislators is more important than their quality. The theory of equality is in fact applied to the intellect of man; and human pride is thus assailed in its last retreat by a doctrine which the minority hesitate to admit, and in which they very slowly concur. Like all other powers, and perhaps more than all other powers, the authority of the many requires the sanction of time; at
